SCIENCE IN SOLUTION

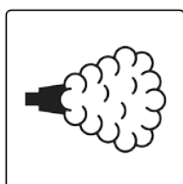

FORMALDEHYDE BPR GRADE

38% w/v FORMALIN

- **A general purpose disinfectant for terminal disinfection and aerial fogging**
- **Foot disinfectant for sheep & cattle**
- **POISON: Read the label carefully before use.**

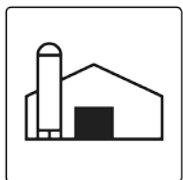

RECOMMENDED USAGE

General Purpose Disinfection:

Use 1 part Formaldehyde to 4 parts water (1:4) and apply at 400ml per square metre.

Fogging:

Use Formaldehyde neat and apply at a rate of 10 Litre to each 10,000 square feet of floor space in the building to be treated. 1000 square metres is approximately 10,000 square feet. Allow 2-3 hours after fumigation has ceased before any re-entry to the building. Always check that the atmospheric levels of formaldehyde are below the specified maximum exposure limit (MEL) before unprotected persons re-enter the building. A Formaldehyde Fumigant Neutraliser is available which may reduce the time required (contact a representative for details)

Footbaths: Dilute at the rate of 5% v/v Formaldehyde in water.

Storage: This product contains stabilisers to prevent precipitation in cold weather. The product should ideally be stored in frost free areas. Store in a dry area away from animals and foodstuffs. Keep pack tightly sealed.

Pack Size: 25, 200 & 1000 litre

Shelf Life: 1 year from date of manufacture

USE BIOCIDES SAFELY. FOR HEALTH & SAFETY INFORMATION, REFER TO THE SAFETY DATA SHEET
